## SKILLS

Javascript	React	Next.js
CSS/SCSS	HTML	Agile/Scrum
Node.js	Git	SQL
Redux	Docker	AWS
NPM	Liquid	E2E Testing

## EXPERIENCE

### Chasing Worldwide - Software Engineer

September 2022 - Present

> Create and upkeep features for a legacy Shopify based website whilst building out a cloud-based ecommerce website utilizing NextJS.

Designed and led the creation of a desktop emulator ecommerce website that was built with reusable components in NextJS.

### Fresh KDS - Software Developer

December 2021 - September 2022

> Implemented RESTful API integrations and developed reusable React components for a cloud-based food ordering application.

Created customer retention by showing customer data in a reusable component that offered integration and support for many third party APIs such as Square or DoorDash.

### Chirotouch - Staff Software Engineer (Mid-Level)

June 2021- December 2021

> Engineered and maintained key features for a HIPAA-compliant cloud-based application using JavaScript and Node.js.

Pitched and led a refactor of a PDF generator using native templating, reducing developer hours and improving efficiency. All whilst working alongside a QA Engineer and UX/Visual Designer.

### Chirotouch - Associate Software Engineer (Junior)

September 2019 - June 2021

> Focused more on fullstack feature creation, bug fixes, and E2E test coverage maintenance.

Created team cohesion by mentoring interns across multiple teams. As well as presenting, with impromptu commentary, new features created during the sprint twenty plus times, to all teams and upper management.

### Chirotouch - Software Engineer Intern

October 2018 - September 2019

> Repaired site-wide bugs and maintained E2E test coverage with WebDriver.IO.

## EDUCATION

### University of Nevada, Las Vegas

Spring 2019

Bachelors In IDS: Computer Science and Business Management
